Education

Sardar Vallabhbhai National Institute of Technology (NIT Surat)

Jul 2023 – May 2027

B.Tech in Artificial Intelligence | CGPA: 7.62 / 10.0 (Current)

Kendriya Vidyalaya, Vadodara

2022

Higher Secondary (Class 12) | 90.4%

Gujarat Public School, Vadodara

2020

Secondary (Class 10) | 95.6%

Experience

Software Engineering & ML Intern

May 2026 – Jul 2026

Kolsite Group of Industries

- Designed an **OCR-based document digitization pipeline** using **Google Cloud Vision API** to parse and validate extracted fields, automating manual data entry across factory operations.
- Developed **cross-platform scanning apps** for real-time **barcode and document capture**; designed **REST APIs** and DB schema for lookup, audit logging, and error handling.
- Prototyped a **predictive maintenance ML model** on sensor data to estimate **Remaining Useful Life (RUL)** of components — research for **IIoT-based condition monitoring** and Industry 4.0.

AI Research & Engineering Intern

Jun 2025 – Apr 2026

Indian Institute of Management Bangalore (IIMB)

- Architected a **GenAI-powered full-stack behavioral experiment platform** (Python, oTree, OpenAI API) studying AI's impact on decision-making; launched with **400+ US participants**.
- Led backend architecture for real-time dashboards; designed scalable data pipelines handling **10k+ records** with automated API ingestion (StockTwits, SEC API).
- Created an admin dashboard coordinating **70+ configurable parameters** across 3 rounds, cutting manual config time by **60%**; earned a **Letter of Recommendation**.

Projects

FutureLens — Agentic AI Forecasting Platform

[GitHub](#)

Python, Prophet, LightGBM, FastAPI, Streamlit, Gemini API, Groq (Llama 3.3), SHAP

- Delivered an end-to-end decision intelligence system forecasting time-series metrics with a **Prophet + LightGBM quantile ensemble**, auto-resampling noisy data with log-transform for variance stabilisation.
- Engineered an **agentic pipeline** (Groq + Gemini API) with **10 structured tools** — anomaly detection, SHAP-based root cause analysis, scenario simulation, and prescriptive recommendations.

Fake Face Detection using Vision Model

[GitHub](#)

PyTorch, CLIP (ViT-B/16), LoRA, EfficientNet-B0, ViT-S/16, Grad-CAM

- Developed a **deepfake detection system** using pretrained vision transformers on **2k+ images**, achieving **91.5% test accuracy** and **0.93 F1-score**.
- Led **LoRA-based parameter-efficient fine-tuning** on CLIP-ViT, reducing trainable parameters by **80%** while maintaining performance; used **Grad-CAM** error analysis on 500+ samples.

Kashvi Creations — Full-Stack E-Commerce Platform

[GitHub](#)

React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT, Vercel

- Deployed a full-stack **MERN e-commerce platform** with **10+ REST APIs** for product listings, cart, checkout, and **JWT-based authentication** for 2 user roles.
- Led development of a scalable role-based admin dashboard with **8+ modules** including bulk messaging, real-time order tracking, product CRUD, homepage configuration, and Cloudinary media management.

Achievements

- Amazon ML Summer School 2026:** Selected from **1,30,000+ applicants** for Amazon's flagship ML program covering Deep Learning, Reinforcement Learning, Probabilistic ML, and Generative AI, led by Amazon senior applied scientists.
- Research Paper — ComSIA 2026 (Springer LNNS):** EEG-Based Depression Detection accepted and published; achieved **96.2% accuracy** with a 1D CNN-BiLSTM hybrid architecture.
- Winner, Web Wonders Hackathon (Nexus, SVNIT):** **1st place** among 10 finalist teams for a full-stack **Forestry-theme** solution on sustainable ecosystem management.
- Flipkart Grid:** Advanced to **top 1,600 out of 10,000+ teams** with a live **LightGBM-based ML solution** using custom scoring and engineered features.
- 2nd Runner-Up, Adani AI Hackathon:** Recognized for AI problem-solving among competitive teams from across India.

Technical Skills

- Languages & Core CS:** C++, Python, JavaScript | OOP, DBMS, OS, CN
- Databases & AI/ML:** MongoDB, MySQL, PostgreSQL | Machine Learning, Deep Learning, Generative AI, LLMs
- Full-Stack & Tools:** MERN Stack, REST APIs, FastAPI, Django, oTree, JWT, Git, GitHub, Vercel
